(HTTP) Request

Example: Browser

Hey Server,
 using HTTP 1.1 version give me
 /index.html from www.codingschool.com.
 My preferred language is US
 English.

Usually the application
 the user interacts with,
 i.e. Web browser, Mobile App,
 Desktop application.

(HTTP) Response

means the request was successful

HTTP version status code status message

HTTP/1.1 200 OK

Date: 1 Jan 2021 09:00

Content-Type: text/html

<!DOCTYPE html>

<html>

<head>

<link rel='stylesheet' href='style.css'>

</head>

<body>

<script src='app.js'></script>

</body>

</html>

GET/style.css HTTP/1.1

Different Server

GET/cat.jpg HTTP/1.1
 Host: www.example.com

Server

GET/app.js HTTP/1.1

Different Server

HTML Element

<a>

HTML Attribute

Attribut
name

Attribute
Value

Common HTML entities:

< → <

> → >

& → &

" → "

 → non-breaking space

© → © (copyright)

These additional
 requests are often
 send parallel to
 increase speed.

Use HTML Attributes to
 modify the behaviour of
 HTML elements.

```

<!DOCTYPE html>
<html>
  ...
</html>

```

Render

Statuses:

200 → OK

301 → Moved Permanently

400 → Bad Request

401 → Unauthorized

403 → Forbidden

404 → Not Found

500 → Internal Server Error

Content Types:

text/html → HTML

text/plain → Plain Text

Application/json → JSON

image/png → PNG image

image/jpeg → JPEG image

Document Object model

HTML

```

<!DOCTYPE html>
<html>
  <body>
    <h1>Hello</h1>
    <p>This is a paragraph.</p>
    <button id='login'>
      Login
    </button>
  </body>
</html>

```

DOM (tree of objects)

Document

Root element:
<html>

Element:
<body>

Element:
<h1>

Text:
"Hello"

Element:
<p>

Text:
"This is a paragraph."

Element:
<button>

id:
"login"

Text:
"Login"

Each HTML element becomes an object/node that JavaScript can interact with.
